## THE FIRE ALARM.

The system of fire-alarms in present use in this city, will doubtless be discontinued at the expiration of the season for which it was contracted for, and there is hardly now a remote possibility that it will be again contracted for. The question now arises what will be done in the matter? Our experience of January last, demonstrates the ecessity for an alarm in this city and a good one; but as the private subscribers have declined to do anything in the way of renewing their subscrip tions to the present one it devolves on the city, as it properly should, to take some prompt and effective measures to put us in a posture of defense so far as this mat-ter is concerned. The present system could be continued at a rental of from \$1,200 to \$1,500 per annum, but investig ion shows that we can purchase one of or own of a satisfactory nature at a cost not very much exceeding those figures.

The Intelligences has not been in

layor of this movement up to this time fr the very obvious reason that the city was only paying about \$375 per annum for the privilege of operating the system now in use, as the remaining \$900 were made up by private subscription, but when proposition is made to increase thi \$1,200, the cheaper and better plan would be to avail ourselves of the other plan. Mr. W. C. Handlan, Chairman of the Committee on Fire Department, has given the subject of the alarm system his exclude. sive attention for some time back, and in the interest of the department has written many places and even visited the city of Zanesville, and with the Chief of the Fire Zanesville, and with the Chief of the Fire Department of that city made a thorough and critical examination of the system now in use there, which was most satisfactory to him. The result of his experiments in the matter we give be low. The majority of the Committee were in favor of continuing the old system under the former rates and so recommended to Council, but the withdrawal of the offer Tuesday night necessitated the reference of the matter to the committee again. It is now very likely that the system recommended by Mr. Handlan will be adopted.

To the Hon. Mayor and Council of the City of

To the Hon. Mayor and Council of the City of Wheeling .

GENTLEMEN: Differing with a majority of the Committee on Fire Department in egard to a fire alarm for the city of Wheeling, I respectfully present the folowing minority report: During the prevalence

fires in the month of January, the Chie Marshal and myself endeavored to estab lish a system of signals by which the engines could be moved as desired. The wear and tear of machinery, and injury to the horses belonging to the department, resulting from long trips made through rough streets to fires, and the fear that two or more fires might occur in different localities at the same time, make it very desirable to be able to control the move ments of the steamers. After a week or ten days spent in the effort, we were obliged to abandon the project, as the Western Union District Messenger Com-pany required more obligations on the part of the Mayor and committee than we

were able to perform.

I then wrote to Zanesville for information Itten wrote to Zanesville for information regarding the fire alarm in that city. The result of this correspondence was a letter from the Chief Marshall of the Fire Department of Zanesville, highly recommending the system there in use, and the appearance here of Mr. C. H. Pond, representative of the Union Fire Alarm Teleresentative of the Union Fire Alarm Telegraph Company of the city of New York, which company had furnished the Fire Alarm for the city of Zanesville.

I invited the Mayor and all of the members of the committee I could reach, and a conference was had with Mr. Pond in

a conference was had with Mr. Pond in regard to putting up an alarm in this city similar to the one in use in Zanesville.

Mr. Pond offered to put up ready for operation, a system of alarm comprising a bell striker of nearly three times the power of the one in use at Zanesville, attaching the same to the capital bell, five sixteen and one half inch engine house gongs, and thirty of their signal boxes, for the sum of \$2,000, and the necessary poles and wire to complete the system for \$100 per mile.

er mile.

For the information of Council, the hief Marshall and myself have located the council and myself have located the council and myself have been made.

For the information of Council, the Chief Marshall and myself have located thirty-seven signal boxes, and have made measurements showing the length of wire required to make the connections.

The Atlantic and Pacific Telegraph Company offer the free use of their poles where they can be made available, and we find that about four miles of wire can be placed, it will require about four miles additional, with necessary poles to complete the connections, making a total length of wire of about eight miles.

This arrangement would locate boxes as follows: Top Mill, corner Third and Main, corner Fifth and Main, corner Frenth and Main, corner Fifth and Main, corner Frenth and Market, City Building, Alley 7 and Main, corner freight and Main, corner Fourteenth and Market, Arcade saloon, Atlantic, corner fourteenth and Roff, corner Twelfth and Main, corner Sixteenth and Wood, Central Glass Company, corner Twelfth and MacCollough, corner Nineteenth and Jacob, Grard Hose, corner Twelfth and McCollough, corner Sixteenth and Wood, Central Glass Company, corner Twelfth and McCollough, corner Nineteenth and Jacob, Grard Hose, corner Twelfth and McCollough, corner Sixteenth and Wood, Central Glass Company, corner Twelfth and McCollough, corner Sixteenth and Wood, Central Glass Company, corner Twelfth and McCollough, corner Sixteenth and Wood, Central Glass Company, corner Twelfth and McCollough, corner Sixteenth and Wood, Central Glass Company, corner Twelfth and McCollough, corner Sixteenth and Wood, Central Glass Company, corner Twenty-second and Market, United, Twenty-sixth and Main, Twenty-fifth and Chapline, La Belle store, La Belle Mill, Thirty-third and Eoff, Hobbs, Brockunier & Co. Glass Company, Eighth ward hose, Fortieth and Jacob, Fritz's store, Chas. T. Cowan's store, corner Ohio and Broad way, Luken's store store, corner Kentucky and North Front, making a total number of thirty-seven signal boxes.

I am of the opinion that the system thus comprehended can be put in operation for about \$4,000.

Thus average of 25 cm.

AMUSEMENTS.—To-morrow night, Hav appear at the Opera House. This is the very best troupe of colored ministrels in the Union, and as exciters of solid fun and mirth, they have no superiors. The Bos on Globe says of them:
"Seldom does a traveling combination

open an engagement under more cheering auspices than did the colored minstre troupe, organized by the indefatigable Haverly, at the Boston Theatre, last even ing. The elements could not have entered into a much more formidable conspiracy into a much more formidable conspiracy to induce people to stay at home, yet the spacious parquet was crammed to its utmost capacity by an audience that went in damp but went away aglow. The balconies also had their due proportion, and even standing room was hard to find. The programme was a brilliant one, and its performance far exceeded even what the tame of the manager would lead one the fame of the manager would lead one to expect. The end-men, ten in all, wer almost numerous enough to form an en almost numerous enough to form an entire minstrel troupe of the ordinary old fashioned patern, and the specialties were original, captivating, marvelous, and surpassingly ludicrous. Of such an entertainment the critic must content himself with saying that there was nothing to condemn and everything to approve."

# ble stone. Tarnished by worldliness, dusted with the activities of life, they have pursued me through the various vicisaitudes of studious professional, literary, and political life. They became the nucleus of studies in college; the were coats of mail in the struggles against selfishness and skepticism; in fine, they prefigured and preordained my choice of spiritual belief, as against the delusive sophistries of new philosophies and mere material science. They have enabled me, in following and studying the physical advancement of the past quarter of a century, to perceive in all the atoms, forms, and forces of nature and the phenomena of mind the truth and benignity of the great scheme of human redemption, which is founded on the veracity of Christ and becomes, with lapsing years, more beautiful with the white radiance of an ennobling spirituality. OPERA HOUSE. One Night Only

In this intellectual stability—upon the rock of truth—is there not some compensation for the shortcomings of our daily conduct? Is this denied by the purist. Will he abide no deflection from the fixed right line of known duty? Ah! is it much to know the line; even if one cannot always walk to it lineally and uprightly. FRIDAY, MARCH 12.
